Preserved flowers and foliage
Preserved flowers and foliage
The preserved technology involves the following 3 basic steps:

1. The flower/plant is harvested at the ideal point of time in terms of natural beauty from one of our 300,000m² of fields.

2. The freshly harvested plant enters a proprietary process to absorb a specific mixture of 100% plant-based and biodegradable preservation formula.

3. The preservation liquid replaces the sap and water within the plant, effectively forming a still-image of nature, creating a unique and 100% natural product. The preserved flowers and plants remain intact with no changes for months without watering, light, and virtually maintenance-free.

4. The basic method of preserving flowers and plants has existed for many years, but it was first patented as an industrial process by Verdissimo over 30 years ago. Through the dedication and effort by the Verdissimo team, the technology has rapidly spread to large-scale operation.

The goal of Verdissimo is to enable you to enjoy the advantages and atmosphere of nature, with an optimum balance between ease-of-use, ecology, and economy.

What are preserved flowers and plants?

1. The unique preservation technology involves the following 3 steps:

   1. The flower/plant is harvested at the ideal point of time in terms of natural beauty from an area of our 300,000m² of fields.
   2. The freshly harvested plant enters a proprietary process to absorb a specific mixture of 100% plant-based and biodegradable preservation formula.
   3. The preservation liquid replaces the sap and water within the plant, effectively forming a still-image of nature, creating a unique and 100% natural product. The preserved flowers and plants remain intact with no changes for months without watering, light, and virtually maintenance-free.

4. The basic method of preserving flowers and plants has existed for many years, but it was first patented as an industrial process by Verdissimo over 30 years ago. Through the dedication and effort by the Verdissimo team, the technology has rapidly spread to large-scale operation.

Advantage of preserved flowers and plants:

Long-lasting and Maintenance-free: Thanks to a special preservation process, the plants do not require any water, light, or maintenance, and look like fresh flowers without sprays or care.

100% Natural: All preserved products by Verdissimo are real, natural flowers and plants that have been treated with a natural and biodegradable preservation liquid. There are no toxic ingredients used.

Eco-friendly: The preservation process is much more efficient than fresh-cut flowers, due to their long shelf life and low energy transport and storage. The result is that the preserved flowers have a carbon footprint significantly lower than fresh-cut flowers and artificial flowers. It also optimizes the environment in which it is created.

Economical: The preserved plants are excellent value because of their long shelf life and low maintenance costs.

Endless Possibilities: The unique attributes and broad variety of the Verdissimo preserved flowers make them useful in a vast array of situations. From a bridal bouquet that will keep the memory alive for years to a green wall of plants that bring nature to your home without worrying about substantial maintenance or cost.

Correct care and use:

1. The flowers and preserved plants are not only beautiful and long-lasting. When used correctly, you can enjoy your natural preserved products for months and even years. The goal is to optimize your experience and the longevity of your preserved flowers.

2. The ideal care for the preserved flowers involves minimal maintenance of just a daily spray every few days or alternatively, during each week's cycle.

   - Floral spray: Spray the preserved flowers or plants in optimum conditions. Always follow the manufacturer’s instructions.
   - Avoid spraying in direct sunlight or near indoor heat sources.
   - Avoid spraying during or after blooming.
   - Avoid over-spraying or under-spraying.
   - Avoid spraying in temperatures below 70°F.
   - Avoid spraying in indoor heat sources.
   - Avoid spraying in direct sunlight or near indoor heat sources.

Shades of the products in this catalog may vary from the actual product.
preserving memories

A smile, a “here I am”, a child’s game, that look from the one that got away.

Moments that you keep near your heart so that they never grow old.
Photos that keep your memories from fading.

Events frozen in time to conserve their youth.
Who is to say that we cannot do the same with a flower?

We stop time because our flowers last forever.
We preserve them.
From cultivation

The flower/plant is harvested at the ideal point in terms of natural beauty from one of our 300,000m² fields. The freshly harvested plant enters a proprietary process to absorb a specific mixture of 100% plant-based and bio-degradable preservation formula.

The preservation

The preservation liquid replaces the sap and water within the plant, effectively forming a still image of nature, creating a unique and 100% natural product. The preserved flowers and plants remain beautiful and unchanged for months without watering, light and virtually maintenance-free.

Our farms around the world

In Colombia, our proprietary farms cultivate roses, orchids and other exotic flowers and greeneries.

In Ecuador, we specialize in roses, especially large and voluminous varieties.

The majority of our vast variety of greeneries come from selected farms all around Europe.

How are preserved flowers collected?

The entire pruning process is carried out by highly trained artisans and the technique is uniquely developed for preserving.

The specific knowhow used to prepare the flower for preservation is the key to reflecting the beauty of the flower at its best.
The basic method of preserving flowers and plants has existed for many years, but was first patented as an industrial process by Verdissimo over 30 years ago. Through the dedicated effort by the Verdissimo team, the technology has optimized and upscaled to today’s efficient and large scale operation.
“Good architecture lets nature in.”

Mario Pei

“Study nature, love nature, stay close to nature.”

Frank Lloyd Wright

Space and interior decoration

At Verdissimo we are convinced that nature is a ‘must have’ complement for any space and interior decoration. That’s why we included in our recently redesigned offices a show room that can be visited virtually and, once feasible again, as well on site.

“Good architecture lets nature in.”

Mario Pei

“Study nature, love nature, stay close to nature.”

Frank Lloyd Wright

This catalogue is alive!

When you see the "AR" icon, you can click or tap to use augmented reality to see the product in actual size and in 3 dimensions on the surface you want.

Use your phone or tablet’s camera and scan the QR code to see our products in your home or office. Move, zoom out or get closer to appreciate the details, from every angle!
Throughout the more than 30 years of experience in the market, we have developed technology that has allowed us to offer and continuously improve our exclusive products that bring the atmosphere of nature into our homes and workplaces. This commitment to quality and innovation has allowed Verdissimo to enjoy the trust and loyalty of our customers, who value the variety of products and the capacity to drive the preserved world forward.

Over the years our customers have enjoyed our products all over the world, including companies such as Interflora, Chopard, and Disney. The variety of creations that our customers have prepared with our preserved products is endless. You can find professional florists, interior designers and decorators using our products to create special atmospheres in restaurants, museums, hotels, events, and homes. The natural appearance, beauty, versatility, and ease of use of our products for these uses are unparalleled.

In the floral sector, preserved flowers are perfect for making long-lasting flower arrangements to keep for years, ideal for bridal bouquets, the flowers in the arrangement for a loved one, or a unique Saint Valentine’s Day gift.

The variety of creations that our customers have prepared with our preserved products is endless. You can find professional florists, interior designers and decorators using our products to create special atmospheres in restaurants, museums, hotels, events, and homes. The natural appearance, beauty, versatility, and ease of use of our products for these uses are unparalleled.

We stop time because our flowers last forever.

Verdissimo
The Aqua Flo system offers a simple and aesthetic solution for two important needs:
• Simulate the effect of water
• Secure your creation in any base or support.
It comes as two separate components mixed together to create both a powerful adhesive and a beautiful image of water to complete any arrangement.

Need water?
Get the perfect look.
