100% natural
All of our products are made from natural materials. They are natural plants that have been treated with a bio-degradable formula.

Preserved to last for years
Our unique process involves using vegetable-based glycerin to replace the humidity within the plant, creating a component that does not evaporate and thereby preserve beauty over time.

Cost-effective
Our preserved trees last for years and significantly lower the need for re-purchasing.

Easy to maintain and install
The products do not require light or water, leading to significant savings in installation and maintenance.

Powerful addition to traditional solutions
The preserved plants can be successfully mixed with fresh or artificial plants for complete design freedom to generate different environments and effects.

Respectful with the environment
The Verdissimo preserved plants are more environmentally friendly than fresh cut flowers due to their long life and lower energy consumption for transport and storage. They result in a significantly lower carbon footprint than fresh or artificial flowers.

What are Verdissimo® preserved trees and plants: not
- They are not freeze dried (lyophilized) or dehydrated products.
- They are not growing.
- They are not artificial.
- They are not toxic.

What are Verdissimo® preserved trees and plants:
- 100% natural
- No light or water required
- Last for years
- No carbon footprint
- No water or energy required
- Easy to maintain and install
In Verdissimo, our inspiration is the vision of our clients, always working to create balance between architecture, functionality and nature.

The natural preserved products create humanized and enjoyable living spaces which allow us to relax and be more creative.

They allow us to soften structural elements of architecture that may seem alien to us.

Bringing nature indoor adds a note of color and creates a unique space.

In areas with elevated noise, the Verdissimo preserved products are sound-absorbing and help create an acoustically pleasant environment.

Natural space dividers help define and customize the environment.

**Maintenance and Care**

To remove dust, clean regularly with a dry or slightly damp cloth/duster or apply compressed air at low power and low temperature. Once free of dust, anti-static polish sprays with paraffin/wax base can be added.

- For indoor use only.
- Do not water.
- Avoid direct and prolonged exposure to sunlight.
- Avoid prolonged exposure to high humidity (greater than 80%).
- Avoid crushing, pressing or folding foliage or flowers.
