preserved flowers and foliage
The unique preservation technology involves the following 3 basic steps:

1. The flower/plant is harvested at the ideal point in terms of natural beauty from one of our 300,000m² of fields.
2. The freshly harvested plant enters a proprietary process to absorb a specific mixture of 100% plant-based and bio-degradable preservation formula.
3. The preservation liquid replaces the sap and water within the plant, effectively forming a still-image of nature, creating a unique and 100% natural product. The preserved flowers and plants remain beautiful and unchanged for months without watering, light and virtually maintenance-free.

The basic method of preserving flowers and plants has existed for many years, but was first patented as an industrial process by Verdissimo over 30 years ago. Through the dedicated effort by the Verdissimo team, the technology has optimized and upscaled to today's efficient and large scale operation.

The Verdissimo preserved plants are extremely resistant and long lasting. With the right care, you can enjoy your natural product for months or even years. The Verdissimo natural products do not require pruning or watering.

The only care the product requires is occasional removal of dust, ideally with an air spray, air blower/dryer or alternatively dusting with a soft cloth.

To keep your Verdissimo flower or plant in optimum conditions, please follow this advice:

- Avoid crushing, pressing or folding the foliage, petals or flowers.
- Avoid prolonged exposure to direct sunlight.
- Avoid exposure to humidity above 75%.
- Only for indoor use.
- No watering or placing the product in water.

Long-lasting and Maintenance-free

The preservation process means that the plants require no water or light and maintain their original beauty and fresh look for months or even years.

100% natural

All preserved products by Verdissimo are real, natural flowers and plants that have been treated with a plant-based and biodegradable preservation liquid. No toxic ingredients are used.

Ecological

The Verdissimo preserved plants are much more efficient than fresh-cut flowers, due to their long shelf life and low energy transport and storage. The result is that the preserved flowers have a carbon footprint significantly lower than for both fresh-cut and artificial flowers. Help protect the environment one rose at the time…

Economical

The Verdissimo natural products are excellent value because of their long useful life.

Endless Possibilities

The unique attributes and broad variety the Verdissimo preserved flowers make them useful in a vast array of situations. From a bridal bouquet that will keep the memory alive for years to a green wall of plants that bring nature into your life without worrying about substantial maintenance or cost.

Since its creation in 1988 in Paris, France, the Verdissimo brand has represented high-end preserved flowers, foliage and trees for unique and sustainable interior decoration and design. Throughout the years, Verdissimo's know-how and proprietary technology has been continuously improved to obtain an exclusive and reliable product. From the beginning, and thanks to the loyalty of our customers around the world, Verdissimo maintains its position as the leading preserved producer in terms of product range, production capacity, innovation for better products and a better environment.

The goal of Verdissimo is to enable you to enjoy the optimum balance between ease-of-use, ecology and economy.

What are preserved flowers and plants?

Correct care and use

Advantage of preserved flowers and plants?

Verdissimo brand
A smile, a “here I am”, a child’s game, that look from the one that got away.

Moments that you keep near your heart so that they never grow old.
Photos that keep your memories from fading.

Events frozen in time to conserve their youth.
Who is to say that we cannot do the same with a flower?

We stop time because our flowers last forever.
We preserve them.
From cultivation

The flower/plant is harvested at the ideal point in terms of natural beauty from one of our 300,000m² of fields. The freshly harvested plant enters a proprietary process to absorb a specific mixture of 100% plant-based and biodegradable preservation formula.

Our farms around the world

In Colombia, our proprietary farms cultivate roses, university and exotic flowers, plumbers, and artificial avenues.

In Ecuador, we specialize in roses, especially large and voluminous varieties.

The majority of our vast variety of greenery comes from selected farms all around Europe.

The preservation

The preservation liquid replaces the sap and water within the plant, effectively forming a still image of nature, creating a unique and 100% natural product. The preserved flowers and plants remain beautiful and unchanged for months without watering, light and virtually maintenance-free.
The basic method of preserving flowers and plants has existed for many years, but was first patented as an industrial process by Verdissimo over 30 years ago. Through the dedicated effort by the Verdissimo team, the technology has optimized and upcaled to today’s efficient and large scale operation.
Throughout the more than 30 years of experience in the market, we have developed a technology that has allowed us to offer and continuously improve our exclusive products that bring the atmosphere of nature into our homes and work places. This commitment to quality and innovation has allowed Verdissimo to enjoy the trust and loyalty of our customers, who value the variety of products and the capacity to drive the preserved world forward. Over the years our customers have enjoyed the products all over the world, including companies such as Interflora, Chopard, and Disney. The variety of creations that our customers have prepared with our preserved products is endless. You can find professional florists, interior designers and decorators using our products to create special atmospheres in restaurants, museums, hotels, events, and homes. The natural appearance, beauty, versatility, and ease of use of our products for these uses are unparalleled.

In the floral sector, preserved flowers are perfect for making long-lasting flower arrangements to keep for years, ideal for bridal bouquets, the flowers in the arrangement for a loved one, or a unique Saint Valentine’s Day gift.

NEW PRODUCTS DEVELOPMENT
Florists, interior designers, and decorators are the main sources of inspiration for the development of new products. We work closely with them to respond to the latest trends in the market.

VERSATILITY
Verdissimo products are used all around the world for interior decoration and design in hotels, restaurants, airports, events, and homes. The versatility of our products is creatively used anywhere where the beauty of nature is needed and desired.

We stop time because our flowers last forever.

Verdissimo
The Aqua Flo system offers a simple and aesthetic solution for two important needs:

- Simulate the effect of water
- Secure your creation in any base or support.

It comes as two separate components mixed together to create both a powerful adhesive and a beautiful image of water to complete any arrangement.
